

FOR IMMEDIATE RELEASE

Cert Center Canada Honored with Deka Award for Innovation & Technology

Montréal, QC – 9th May 2024 – Cert Center Canada (3C), a leader in independent flight testing, aircraft certification, and aerospace innovation, is proud to announce that it has received the prestigious **Deka Award** in the **Innovation & Technology** category. The award was presented to 3C and its President, **Dr. John Maris**, in recognition of the company's outstanding contributions to aerospace research, development, and cutting-edge technological advancement.

The **Deka Awards**, hosted by Montréal's Hellenistic community, celebrate excellence across various sectors, with a focus on innovation, leadership, and community impact. Cert Center Canada's recognition reflects its commitment not only to technical excellence in flight testing and regulatory certification but also to pioneering **intellectual property (IP)** and **R&D initiatives** that are shaping the future of aviation.

"We are honored to receive this award, which speaks to the dedication and ingenuity of our entire team," said **Dr. John Maris**, President of Cert Center Canada. "Innovation is at the heart of what we do—whether we're supporting complex aircraft certification programs, developing next-generation flight safety technologies, or advancing our growing portfolio of proprietary IP."

3C has built a reputation as one of Canada's premier independent flight test and certification organizations. Beyond regulatory compliance services, the company's focus on **technology development** has positioned it at the forefront of **emerging aerospace challenges**, including sustainable aviation, advanced air mobility (AAM), and novel aircraft systems integration.

The award ceremony was a memorable evening, celebrating the accomplishments of diverse innovators across multiple industries. 3C extends its congratulations to all the other honorees and expresses gratitude to the event organizers and the Montréal Hellenistic community for this recognition.
