

FOR IMMEDIATE RELEASE

Cert Center Canada President, Dr. John Maris, Named Fellow of the Society of Experimental Test Pilots; Presents Breakthrough in Advanced Display Technology

Montréal, QC – 25th Sept, 2024 – Cert Center Canada (3C) proudly announces that its President, **Dr. John Maris**, has been named a **Fellow of the Society of Experimental Test Pilots (SETP)**—a prestigious recognition of exceptional contribution to the field of flight testing. The honor was conferred during the **68th Annual SETP Symposium**, held in California from **September 25–28**.

The title of Fellow is reserved for test pilots who have demonstrated outstanding professional distinction and technical leadership throughout their careers. Dr. Maris, a veteran experimental test pilot and innovator, joins a select group of aerospace professionals celebrated for shaping the industry's future.

At the symposium, Dr. Maris also delivered a technical presentation titled **"Dynamic Non-Linear Displays (DNLD): No More Compromises,"** showcasing a transformative advancement in cockpit display technology. The research, developed through 3C's R&D initiatives, demonstrates how DNLDs can achieve:

- **Dynamic legibility**
- **Wide scale-range adaptability**
- **Precision in fine-control regions**
- **Full-scale linearity**

This innovation addresses longstanding trade-offs in flight display design and opens the door to safer, more intuitive pilot interfaces across a broad range of aircraft platforms—including emerging aviation systems such as **eVTOLs** and **remotely piloted vehicles**.

“Being named a Fellow by SETP is an extraordinary honor,” said **Dr. Maris**. “It’s also an opportunity to share 3C’s ongoing work in redefining flight displays through science-driven innovation and to contribute to the broader advancement of flight safety and control.”

Cert Center Canada continues to be a hub for flight test expertise and aerospace innovation. Alongside its core certification and testing services, 3C invests significantly in **applied research and proprietary IP**, driving advances in systems integration, avionics, and human-machine interfaces.

About Cert Center Canada

Cert Center Canada (3C) is a Canadian-owned independent flight test and certification organization, delivering expert solutions to aerospace manufacturers, operators, and regulators globally. With a unique combination of operational experience, engineering rigor, and a focus on

innovation, 3C plays a key role in the development and safe introduction of next-generation aerospace systems.
