**FOR IMMEDIATE RELEASE**

**Marinvent Affiliate *Advanced Aerospace Solutions LLC* is on FAA's \$1.2B NextGen Team.**

Raleigh NC – Advanced Aerospace Solutions, LLC (AdvAero) announced it is on the General Dynamics (NYSE:GD) team selected for the Federal Aviation Administration's (FAA) Systems Engineering 2020 Research and Development / Mission Analysis Support Program. The ten-year contract has a maximum value of \$1.2 billion for the team, if all options are exercised.

Advanced Aerospace Solutions LLC will support General Dynamics in its activities on the FAA's NextGen modernization program. This program will provide the research and development and systems engineering services to the FAA as it introduces new technologies and procedures that will modernize and enhance the efficiency of the U.S. national airspace system (NAS). The NextGen development program will entail the use of flying laboratories - aircraft specifically equipped to conduct large-scale demonstrations and evaluations of the NextGen concepts, procedures and technologies.

AdvAero is a company formed between longstanding partners Marinvent Corporation, Maris-Worden Aerospace Inc., and Haynes Consulting, Inc. The company offers a unique combination of technologies, subject matter experts and resources, including sophisticated airborne laboratories and state-of-the-art simulators which will substantially reduce the risk and cost associated with the development of NextGen technologies. AdvAero performs rapid-prototyping of emerging technologies, including unmanned vehicles, throughout all stages of the development cycle, from early simulations through high-fidelity flight-testing for certification credit. AdvAero's partners' numerous successes in rapid prototyping, flight-testing, human factors, and systems engineering, have earned its personnel numerous industry awards, including an Aviation Week Technology Laureate.
